EXPERIENCE

Web Developer, Thinking Big
Oct. 2016 - Present
- Proficient with various full-stack frameworks in order to maintain and develop web software for numerous clients **(Ionic & Angular 2 & Node, C# & .NET, PHP & SQL)**.
- Experience practicing Agile processes to ensure the development of software continuously meets client requirements.
- Worked closely with designers and developer to create online forms with Adobe LiveCycle and Javascript to help enhance the e-service applications of Veterans Affairs Canada.
- Independently creating tools to automate testing and scripting of XML forms saving time, decreasing errors, and avoiding rework for the Veterans Affairs Forms department.

Co-Founder & CTO, TimeShiftHR
Jan. 2016 - Oct. 2016
- Strategize the development timeline of scheduling software from conception to production using Agile processes as scrum master.
- Implementing modern multi-platform design, powerful frameworks, and industry best practices. **(Google Material Design, Angular 1, JWTs and Python)**
- Played a critical role in the completion of the Propel ICT Startup Accelerator, a competitive 12 week program that specializes in teaching lean business principles of sales, marketing, and growth to viable startups.
- Received the Innovation PEI Excellence Award for being most likely to succeed from a group of 7 IT company presentations.
- Accepted into the StartUp Zone Incubator where mentorship, startup collaboration and key topical presentations expanded my business and technical knowledge.

Web Developer, Maritime Fun Group
Jun. 2015 - Nov. 2015
- Working closely with company founders to prototype, design and develop public facing websites for multiple amusement parks. **(HTML, Bootstrap, jQuery, javascript and CSS)**
- Independently creating scheduling, punch clock and POS software to save time, optimize labor costs, and gather crucial visitor information used for marketing and advertising. **(Bootstrap, Angular 1, and php)**
